

# CSE 465 Midterm #3

Olcay Taner YILDIZ

## I. COURSE APPLICATION

Create a course tabbed application with the following three tabs:

```

<courselist>
  <course code="CSE111" name="Fundamentals of Programming">
    <student name="abdukkadir"/>
    <student name="ali"/>
    <student name="alper"/>
    <student name="cistem"/>
    <student name="eren"/>
    <student name="harun"/>
    <student name="gulgun"/>
    <student name="mahmut"/>
    <student name="mevlut"/>
    <student name="murat"/>
    <student name="muzaffer"/>
    <student name="sami"/>
  </course>
  <course code="CSE112" name="Object Oriented Programming">
    <student name="alper"/>
    <student name="cistem"/>
    <student name="eren"/>
    <student name="harun"/>
    <student name="gulgun"/>
    <student name="mahmut"/>
  </course>
  <course code="CSE202" name="Data Structures and Algorithms">
    <student name="mevlut"/>
    <student name="murat"/>
    <student name="muzaffer"/>
    <student name="sami"/>
  </course>
  <course code="CSE222" name="Database Systems">
    <student name="abdukkadir"/>
    <student name="ali"/>
    <student name="alper"/>
  </course>
</courselist>

```

The data should be loaded from xml file given.
